

# NCTS Taiwan-Japan Symposium on Celestial Mechanics and N-Body Dynamics 2013

國家理論科學研究中心

台日天體力學與N體問題研討會

Dec. 6-7, 2013

Celestial mechanics and n-body dynamics have been studied by many prominent mathematicians and physicists for centuries. The symposium which brings together mathematicians and physicists in relevant fields has been held every year in Japan since 1967. This year the symposium will be organized by Taiwanese and Japanese researchers, and will take place at the National Center for Theoretical Sciences in Taiwan. The topics concerned with mathematical, physical and computational aspects of celestial mechanics as well as the space mission. The purpose is to provide an opportunity for interaction between people in those fields.

## Invited Speakers:

- Hideki Asada (Hiroasaki University)
- Mai Bando (Kyushu University)
- Stefano Campagnola (Japanese Space Agency, JAXA)
- Toshiaki Fujiwara (Kitasato University)
- Jun-Shian Hsiao (Department of Math, National Tsing Hua University)
- Tomoaki Ishiyama (University of Tsukuba)
- Ing-Guey Jiang (Institute of Astronomy, National Tsing Hua University)
- Tsung-Lin Lee (National Sun Yat-Sen University)
- Ryo Suetsugu (Kobe University)
- Ya-Lun Tsai (Department of Math, National Tsing Hua University)
- Li-Chin Yeh (Department of Applied Math, National Hsinchu University of Education)

## Organizers:

- Kuo-Chang Chen (National Tsing Hua University, Taiwan)
- Masaya Saito (The Institute of Statistical Mathematics, Japan)
- Masayoshi Sekiguchi (Kisarazu National College of Technology, Japan)
- Mitsuru Shibayama (Osaka University, Japan)

## Venue:

- National Center for Theoretical Sciences (NCTS),  
National Tsing Hua University, Hsinchu, Taiwan
